THE SANTA POD STORY...

As the years roll on, it's hard to believe that Santa Pod Raceway has been organising, running and promoting drag racing events for **60 years!**

When RAF Podington, a second World War airfield was decommissioned in 1960, the disused runway was converted into a dragstrip and Santa Pod Raceway was established as Europe's first permanent drag racing venue.

Santa Pod opened its gates in 1966. What started back then as a fledgling facility and a fledgling sport for that matter, has today become a major motor racing venue and part of a global motorsport.

The events that we host today at Santa Pod have reached a very different level from those of 1966 and those early drag racing pioneers could never have envisaged just how far their hobby and passion has come today.

The current calendar is impressively diverse and might seem to exceed the definition of "motorsport" as perceived by many people. In many ways it seems far removed from the straightforward, drag racing-only schedule of the early years yet it remains true to the pioneering "Santa Pod spirit" of those first days. That perhaps is the secret of Santa Pod's success. It is a central part of a sport in which it has played a key development role.

"Santa Pod is a place that you could call 'off the wall' – 'street cool' even – a venue that invites levels of experience, participation and involvement that stretch beyond the realms of mere spectatorship."

Santa Pod Raceway CEO, Keith Bartlett

Today, Santa Pod is a wide-ranging entertainment venue with a dragstrip at its heart, offering a diverse weekly programme of events running from February to November. The present management team, headed by CEO Keith Bartlett, has been in charge for 20 years. Over 400,000 visitors pass through the gates annually to attend an array of lifestyle, motor-enthusiast and family events in addition to the 'conventional' drag races which remain the venue's core.
